## DR. HUME TO SPEND THE SUMMER IN CENTRAL ALBERTA OIL FIELDS

Other Geologists Investigating Formations In  
The Irma-Wainwright Oil Field

Dr. G. S. Hume, of the Geological Survey Department, Ottawa, is leaving the east this week and will be in Irma and Wainwright about June 1st, when he will resume the investigations started by him last season. Last season Dr. Hume explored in a general way most of the area between Viking and Baxter Lake, but owing to the large area covered and the number of wells being drilled, at which valuable data was obtained, it was only possible to roughly pass over many interesting places which will no doubt be more thoroughly investigated this summer. After the conclusion of last summer's work, Dr. Hume issued a very interesting report of his investigations in the Irma-Wainwright field, no doubt at the conclusion of this summer's work a more complete report will be issued by him.

### J. G. Williams Has Geological Party in Field

Mr. J. G. Williams, geologist and former manager for the Western Consolidated Co., was in Irma, Thursday and Friday of last week. Mr. Williams has a party of engineers looking over the field. The party left Irma for Wainwright Friday and intend establishing a camp north of Baxter Lake, from where observations will be made of the area extending as far north as Grizley Bear Coulee, where some interesting outcroppings have been located.

### At The Wells

Practically no new developments have taken place at any of the wells being drilled during the past week. At the Maple Leaf well a test has been made of the gas encountered in Number One well, until an analysis has been made of the product secured from the gas no definite report can be given. Mr. Chas. Bremmer, one of the directors of the company, was in Irma Tuesday night and reported that the test looked very promising, so much so that the company had decided to forego any further drilling in Number One well. The machinery at this well is being dismantled, and placed in position at Number Two location, where drilling will be commenced as soon as the machinery has been installed.

### Irma Oil Development Co. Hold Meeting

The annual meeting of the shareholders of the Irma Oil Development Co., was held in Irma last Saturday evening. The shareholders approved of the contract that has been made for the completion of the present well. A resolution was also passed approving of the directors' action in securing a franchise for the distribution of gas to the residents of Irma. Mr. A. K. Hudson was elected as a new director to fill the vacancy caused by the resignation of Dr. S. R. McGregor, who has left the district. The drilling at the company's well is progressing nicely although considerable trouble has been encountered in passing through some hard boulders.

## ST. ANBIN R.C. SEPARATE SCHOOL DISTRICT, NO. 24

### NOTICE

The ratepayers of the St. Aubin R. C. Separate School District No. 24 are hereby notified that a special meeting will be held in the school room Saturday June 6th at 7 p.m. for the purpose of electing a trustee to fill the vacancy on the Board.  
Signed P. O'BRIEN, Chairman.  
I. E. COLLETTE, Sec'y-Treas.  
Nothing is lost until you've lost your courage.

## POOR GERMINATION IN OATS

Attention of the Provincial Department of Agriculture has been drawn to the fact that considerable wheat and oats in northern parts of Alberta are showing poor germination. It is pointed out to farmers that no seed should be sown unless the germinating qualities are known. A pound sample of the seed should be sent to the Dominion Seed Branch, Calgary, for a germination and purity test. The test costs only 50 cents per sample.

## CROP PROSPECTS ARE IMPROVED BY RAINS

The hot weather, that has prevailed during the past two weeks, has been definitely broken by a number of good showers that have soaked into the ground some three or more inches. Prospects are considerably improved, and rapid growth in fields and pastures will result.

## SALE OF HOME COOKING AND CANDY ANNOUNCED

The Westminster Ladies Auxiliary wish to announce that they intend holding a sale of home cooking and home made candy, Saturday May 30th in aid of the church funds. Afternoon tea will be served from two o'clock. Suitable donations of cooking and candies are solicited from the ladies of the district. The men of the district are also invited to attend and purchase a few delicacies.

The sale will be held in the store lately occupied by Mr. Fisher.

## MANITOU LAKE COUNCIL MEETING

A meeting of the Council of Manitou Lake was held in the hall at Marsden, Sask., on the 30th. The minutes of the last meeting were read and passed on motion. Present: Reeve Berry; and Mrs. Wells, Lawson, Smith, Dutton and Bradley.  
Fencing: It was moved that M. S. K. Wells be paid the sum of \$40.00 for moving his fencing on the section 44-46-27-3rd. Moving made necessary by road diversion. Carried.  
Crows: Lawson, That prizes for crows heads and eggs be given to those persons who have the largest number of eggs and heads in total. Carried.  
Grant: Bradley, that we grant the Salvation Army the sum of \$50.00 amended Wells that the amount be \$75.00. Amendment lost, motion carried.

Roadway Lease: It was moved that H. B. Polkinghorne be granted permission to fence in the roadway East of the N.E. 9-45-27-3rd. Carried.  
Divisions: It was moved that L. P. Aldrich be paid at the rate of \$10.00 per acre for a diversion on the N.W. 18-46-26-3rd, said rate to cover claims accountable to the diversion in full. Carried.

It was moved that payment be made to the Manufacturers Life Insurance Company for a diversion on the N.W. 18-44-28-3rd, said payment to cover claims in full accountable to the diversion. Carried.  
It was moved that payment be made at the rate of \$21.00 per acre for diversions taken on the following lands. S.E. 3 S.E. 27 S.E. 15 S.W. 25 N.W. 23 44-28-3rd N.E. 35-43-28-3rd.

(Continued on page eight)

## MEN CAPTURED BY WAINWRIGHT POLICE ESCAPE IN SASKATCHEWAN

Two Men Jumped from Train on Way to the Penitentiary

REGINA, May, 16.—It now develops that Jack Norris and Jack Nahanoff, the two convicts for Prince Albert Penitentiary eluded their guard by jumping from a train window between Duck Lake and Macdowell Wednesday, escaped while on their way back from North Battleford where they had been sentenced to 14 and 12 years respectively. It had previously been reported that the men had gained their liberty while on the way north so stand trial.

The sentence was imposed by Chief Justice Brown when the pair were found guilty of the theft of jewels from the shop of T. Weedon at Radisson, Sask., last September.

The escaped men were sentenced last fall at Edmonton to ten years in the Prince Albert Penitentiary for breaking and entering, and were subsequently sentenced to another term of ten years in the same institution by Mr. Justice Maclellan, at Wynyard for breaking into the store of Newman Brothers at Punichy.

## JOHN HALL DIES AT WAINWRIGHT

John Hall, of 10611 127th Street, for sixteen years a resident here has been chief inspector of lands and valuator for the National Trust Co., died suddenly at Wainwright on Saturday forenoon at 10.30. Deceased had been on a tour of inspection in Chauvin district the day before and was suffering from heart trouble when he returned to the hotel at Wainwright, Friday night, dying in the sitting room the next day.

A man of 63, Mr. Hall came from England to Canada 45 years in 1909 when he joined the National Trust Co. He leaves a wife and six children to mourn his loss.

There are three sons, John and Thomas of Edmonton and Edward of Vancouver. Four daughters, Mrs. Bishop, of Stonewall, Nellie, Hettie and Lenora of Edmonton.

The late Mr. Hall was well known in Irma district where his company has several loans.

## WILL PETTINON FOR LAYING OF RAILS

Petitions calling for laying of the rails on the Hudson Bay Railway into Port Nelson will be placed in every polling booth in Saskatchewan on election day June 2, by the Farmers' Union of Canada, working in co-operation with On-To-The-Bay Association.

Buy it for less at Saker's.

## MANITOULAKE AGRICULTURAL SOCIETY

It is announced that the Manitou Lake Agricultural Society intend holding an old fashioned picnic at Manitou Lake, Saturday afternoon, ay 30th. All members are cordially invited, and to bring as many friends with them as possible, as it is hoped to make final arrangements as to what the members intend doing this year. The ladies are asked to bring baskets. The committee hope to see a real good response to the efforts they are making in order to get the society in good working order.

## SCHOOL FAIR WILL BE HELD AT MARSDEN FRIDAY, AUGUST 21

The Manitou Lake School Exhibition Association is making active progress with its arrangements to hold the school fair at Marsden, Friday, August 21st. The revised prize list has been prepared, and is now in the printer's hands. The committee acknowledge with thanks a grant of \$100.00 by the Rural Municipality of Manitou Lake, and a license shield is also offered by the municipality; also a cup donated by R. C. Bruce.

## NOTES FROM NORTH EAST

Good progress is being made in the erection of the new Sherlock Lake school.  
There are still a lot of stray animals round in spite of herd-laws coming into force on the 15th.  
We are glad to have had some rain. It was needed to live things up. Prospects are now good.

## CHAUVIN AGRICULTURAL SOCIETY DIRECTORS MTG.

The directors of Chauvin Agricultural Society met Saturday, May 16. Vice-President, Mrs. Armour in the chair.

Minutes of last meeting were read and on motion of J. Tooth W. Petrie were adopted.

Dr. Polkins takes chair. J. Tooth reported that the municipal district of Ribstone had given the Society a grant of \$150.

Mr. Geo. Snell attended the meeting and offered the Parcels & Foxwell cup lately won by him for the best Shorthorn bull 2 years old or over. Cup to be won three years in succession.

Secretary was instructed to put a notice in the paper stating that donations and special prizes would be appreciated by the Society and also write to some of our out-lying exhibitors to the same effect.

It was decided that a school fair in conjunction with the fall fair would be beneficial to both, but nothing definite was done.

## Here and There

According to the Alberta Provincial Department of Agriculture nearly a quarter of a million bushels of oats were shipped from that province to New Zealand for seed purposes last winter.

The Quebec Provincial Automobile Bureau estimates that well over 100,000 automobiles will be registered in that Province during the year. This will mean an increase over the 1924 registration of about 15,000 cars.

The 1924 exports of live cattle to Great Britain exceed the 1923 figures by over twenty-two thousand heads, according to the official Canadian returns. Exports to the United States also show a slight increase.

Four small wooden vessels to act as tugs and feeders from Coronation Gulf to Herschel Islands, in the Arctic, are being built at Vancouver, B.C., to the order of the Hudson Bay Company. They will be well powered and sheathed in iron bark.

There is now only one mine in the Crow's Nest Pass district idle. Between eight and nine thousand tons of coal are being mined there daily and the mines at Coleman, Blairmore and Bellevue are rapidly striking their stride, their output being about six thousand tons.

Although the chief beneficiaries under the new British preference proposals will be Canadian sugar, tea, and automobiles, it is stated that Canadian wines and silk goods will also benefit to a certain extent. In the sugar preference an increase of about 25%, and in tobacco of from a fourth to sixth has been made.

By a recent Order-in-Council of the Lieutenant-Governor, premiums for clearing land, which had previously been set at \$6 an acre, were increased to \$8. The Order also provides that the premium will be paid for a maximum of twenty acres of land and, as a result of it, a settler may obtain a grant of \$160 from the Government as a reward for his work.

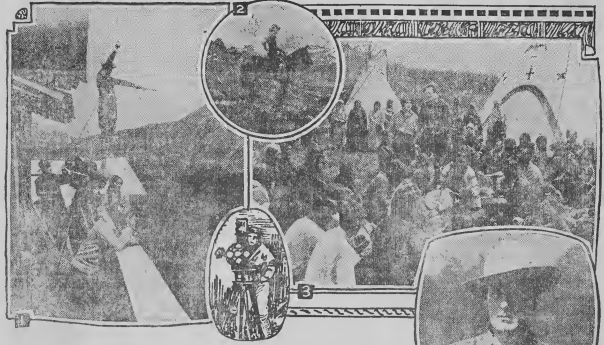

According to the first weekly report issued by the Canadian Pacific Railway, the crop acreage this year will be slightly less than last. It is estimated that Manitoba will sow about 2,643,000 acres this year, Saskatchewan 8,555,183, and Alberta 2,721,689 making a total area of 13,919,872 as compared with 14,153,905 in 1923.

Very encouraging reports as to the general agricultural outlook in Southern Alberta have been received from Canadian Pacific Agents around Calgary. Much more progress has been made with seeding than was anticipated and conditions are described as either "splendid" "fine" or good and in every case plenty of moisture in the ground is reported.

The country is being beset by moving-picture stars. Mary Pickford, Viola Dams, Tom Mix, Harold Lloyd and others have passed through within the last few weeks, and explored the Rocky Mountains and other Canadian attractions. The latest is Hoot Gibson, who is bringing a large company of movie people here to film the Calgary Stampede as an incident in a "super" drama.

Lord Aberdeen and Tensair, former Governor-General of the Dominion and Lady Aberdeen passed through Canada recently with the British delegates to the seventh Quinquennial conference of the International Council of Women, of which the Marchioness is president and founder, at Washington. On the bridge at Niagara Falls Her Ladyship was presented with a golden key symbolic of free entry into the United States.

## Movie-Making in Canadian Rockies

1—Directing an Alaskan drama in Banff. 2—A Northern villain hiding in the Rockies. 3—A scene from "The Alaskan" featuring Thomas Meighan and screened near Banff. 4—Thomas Meighan.

While it may be true that in the making of moving pictures Canada lags a trifle behind the United States, there is at least one particular in which American producers are becoming more and more dependant upon the Dominion for the proper production of their super-films. And that particular is scenery.

They may have their stars, their mechanical contrivances, their experience and their wealth, but during the past few years they have learned that for sheer beauty of scenery and splendor of "settings" the Canadian Pacific Rocky Mountains are unsurpassable. That this discovery was made at all is due mainly to one, Mr. Ernest Shipman.

Two or three years ago it occurred to Mr. Shipman (who has produced some notable pictures in his time) that there were certain spots in the Rocky Mountains, such as Banff, Lake Louise, Emerald Lake and their environs, which were, on account of their singular beauty, admirably adapted to the production of Northern scenes. So he marshalled his forces and directed his men to work securely under his arms and embarked, via the Canadian Pacific Railway, for the Rocky Mountains.

Here, with Henry MacRae directing, he proceeded to film "The Foreigner" near the shores of Lake Louise, with the magnificent mountains for a background, and for a stage, one of the most exquisite spots on earth. The result was that not only did he produce a splendid picture but that the Rockies sprang into instant popularity as a setting for northern dramas.

Since then scores of other "super-films" have been produced and many villains have paid the penalty of their foul deeds, many modest maidens have yielded to the wooing of strong, silent men; many dauntless heroes have faced the nameless terrors of the Alaskan wilds, on the peaceful shores of Emerald Lake and the innocent highway between Banff and Windermere.

Among the most notable pictures screened entirely or in part, with the Rockies for a background, are "Back to God's Country", "The River's End", "The Alaskan", "Empty Hands", "The Sky Pilot", "Glenarry Schoolboys", "The Man From Glenarry", "The Valley of Silent Men", "Frivolous Sal", "Strongheart" and "The Foreigner".

The chances are, then, that when

you sit in your favorite movie house and gaze in silent admiration on the forbidding heavy of Alaska, the hills of Shasta or the still Sierras, you are, in reality, gazing at something far nearer home, not nearly so forbidding and infinitely more beautiful—the Rocky Mountains themselves.

So, America may have her Hollywood and her monopoly of the industry, but now that the value of the Rockies as a place where people may shake the rapids, kill each other, make love, win fortunes and indulge in the other pleasant pastimes peculiar to movie-making, has been realized, it is to be hoped that Canada's position in the realm of the silent drama will shortly become more prominent than it has been in the past.

The Rockies are now easily accessible; there are Canadian Pacific hotels at some of the most attractive points, the light, atmosphere and other conditions are good, and there is no reason in the world why they should not eventually become a veritable "Hollywood of the Hills".

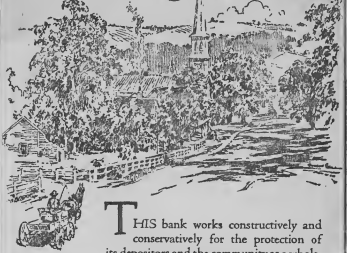

## STUBBLE TREATMENT

A nine year average yield at Seott shows the second crop of wheat after summerfallow to be 23 bushels 28 lbs per acre when seeded immediately after a perfect burn of stubble in the spring. The perfect burn is very important and has been effected on this small area under test by first scattering straw over the stubble. This would not be practical on a large scale but it does give the definite value of a perfect burn on clean mellow land free from grass and perennial weeds.

The average yield resulting from spring ploughing without burning was 21 bu. 38 lbs and fall ploughing 16 bushels 46 lbs. per acre. Burning stubble in the fall and disced in spring before seeding gave 20 bushels 45 lbs. Stubble disced in the fall and seeded in the spring without ploughing gave 19 bushels 32 lbs. The nine year average is not available for drilling in the stubble without any treatment but in 1924 this treatment resulted in a crop failure while spring ploughing in the same test gave approximately five bushels per acre. In the wet season of 1923 the crop on untreated stubble yielded 24 bushels 20 lbs and the spring ploughing 33 bushels 42 lbs per acre.

In the stubble treatment for shows a yield of 31 bushels 12 lbs per acre to result from the cultivating of the stubble just before seeding, 45 bushels 9 lbs from fall ploughing and 52 bushels 32 lbs from spring ploughing.

## SOUND BANKING PROTECTS THE COMMUNITY

THIS bank works constructively and conservatively for the protection of its depositors and the community as a whole.

Because the Bank of Montreal for more than a century has endeavored to do this, it has come to be regarded throughout the length and breadth of the Dominion as a sound, safe and friendly institution.

There are six hundred branches of the Bank of Montreal. Each branch has the strength, stability, experience and services of the entire organization. Make the nearest branch your banking headquarters. Talk with the manager on matters of banking or business. Write to him or call in person. You can bank with us by mail.

## Sweet Clover

### GROWING SWEET CLOVER ON THE I. H. C. FARMS

By J. G. Haney, Agri. Exten. Dept., International Harvester Co.

#### GOOD FOR PASTURE AND SOIL BUILDING

We seeded a small patch of sweet clover in the I. H. C. farm Grand Forks, N. Dak., the first year we had it, 1913, and in 1914 we seeded 10 acres more. At the Aberdeen, S. Dak., Farm, we seeded 25 acres, and have grown a large acreage each year.

The two fields seeded in 1914 were sown with Marquis wheat as a nurse crop. At Grand Forks, corn land was loosened up with the corn cultivators, and harrowed as a preparation before seeding. Owing to the land being rather wet at the time we wanted to prepare it, the disk harrows did not work well, so we used the corn cultivator. The duck foot cultivator, when available, does a better job than the disk of corn cultivator. Seeding was done as early as possible, using a grass seeder on the front of the drill, and sowing the sweet clover seed broadcast in front of the disks and a packer was used to crush the seed into the soil. The seed may be mixed with the grain, but a more even stand is secured with a grass seeder. If the soil is dry at seeding time, we would use a packer before seeding, run the seed in with the grain, but not seed very deep, and pack after seeding if dry. We seeded a little less than one bushel of wheat per acre, as we were anxious to give the sweet clover a chance to start. It is probable that either sweet clover or alfalfa may usually be seeded with a nurse crop in the Red River Valley or regions of similar rainfall, but farther West as the rainfall decreases, either had better be seeded alone unless summer fallow, corn or

potato land is to be seeded; drilling the seed alone in clean stubble or on rye just before freezing-up is very satisfactory. We sowed 10 lbs of hulled seed per acre, and seemed a very thick stand. It is also probable that the amount of seed sown per acre may be decreased in about the same proportion as alfalfa, as we go West. That is, the lower rainfall, the less seed should be used.

We consider Marquis wheat the best to use as a nurse crop, as it is early and does not shade the ground as much as some other varieties. Barley, flax and other grain crops are used as nurse crops with success. When there is plenty of moisture, the sweet clover makes a good growth after the wheat is cut, and is excellent pasture. It makes a quick start in the spring for pasture and can be cut for hay early in June.

If we are not very anxious to give it a full chance to make a seed crop, we wait a little longer before cutting for hay, but if the spring is backward and we are anxious to get seed, we cut it early and get a fair quality of hay, although we often have trouble in getting it put up in good shape, on account of wet weather at this time. Clipping when only 12 to 18 inches high and leaving the clipping on the field is practically insuring a seed crop. The clipped crop will produce more seed, and does not grow so large that it is difficult to harvest. If hay is desired, we would cut two crops of hay on a part of the field.

We seeded our first field on the Aberdeen Farm on new land—the prairie sod having been broken the year previous, but no crop grown. The sod was double disked and harrowed in the spring, as a preparation. In every other respect the field was seeded and treated in the same way as at Grand Forks, and the results were very similar. The growth at Aberdeen was larger, but the seed production was not as heavy as at Grand Forks. In ten years we have never had a failure in securing a catch of sweet clover. We have ploughed it under, pastured, cut for hay, and sold thousands of dollars worth of seed. It makes good in every way.

#### SWEET CLOVER FOR CALAMITY HOWLERS

Dan Eastman, near Gilby, N. Dak., plowed under 80 acres of sweet clover in 1919, and got a yield of 25 bushels of wheat per acre in 1920, in spite of the rust. It looked good for 40 bushels before the rust struck, but the 25 bushels per acre was twice as much as was secured on land that had not been in sweet clover.

Iowa farmers report increasing the yield of corn 40 bushels per acre by plowing under sweet clover. Careful experiments indicate that a crop of sweet clover plowed under will double the yield of potatoes. Our notation on the L.H.C. Farm—grain, clover, and corn—has more than doubled the average yield of grain. Our yield has averaged 25 bushels for the past seven years, and 30 bushels for three of those years. We could not do it without sweet clover, a rotation of crops and live stock.

Geo. W. M. Nutting of the San Luis Valley, Colorado, had 80 acres of volunteer sweet clover in 1910, and says: "Our whole country was threatened with being over-run with this useless weed, which stock would not eat. Calamity howlers foretold the ruin of our country as a farming section unless the volunteer spread of sweet clover could be checked, while our best farmers employed men each summer to uproot the plants, which had started in their fields. For this was before the time when anyone dared to take a hand in defence of this plant, or at least before the news of such a stand having been taken had reached us in this section."

"Meanwhile the field of 80 acres was in full bloom and the seed pods were beginning to form. Something had to be done. I started out to hire teams and mowers to cut the clover before any further damage could result. Before I had found anyone to do this work a neighbouring farmer came to me and offered to cut the clover for hay if I would give him the crop. As I had expected to have to pay for doing this, I closed a deal with him at once. Everyone ridiculed the idea of sweet clover for hay, for there were hundreds of people who would take oath that stock would not eat it."

"Nevertheless, this rancher went ahead with his cutting and put the hay up in good shape, the same as he would handle alfalfa, some 175 or 200 tons from the cutting. His horses and cattle did eat it all winter long and the surprising part of it was that they thrived on it, in spite of the fact that the first cutting was several weeks too late and the stalks had already begun to harden. This, as far as I know, was the first use made of sweet clover in our section. From this field, we could probably have harvested a four-thousand dollar crop of seed, had we been wise enough and had there been any market for the seed at that time."

#### SOLD SEED FOR 9 CENTS A POUND

"The following season I had some 20 acres of sweet clover in a field adjoining the 80-acre field. By this time the news had begun to percolate into our section that in some parts of the country there were people foolish enough to sow sweet clover for pasture, hay and fertilizer crop. But our people gave no great amount of credence to this news. Moreover, as the clover on this 20-acre field seemed to be fairly well seeded, I had the crop harvested and threshed with an ordinary grain threshing outfit, which nearly knocked the seed pods from the stems without hulling the seed. I found a market for this seed in Denver at 9 cents a pound. As far as I know, this lot of sweet clover seed was the first ever shipped out of the valley, although a neighbouring ranch had saved a crop of seed the year previous without being able to find a market for it.

### EDITORIAL COMMENT

The Alberta government has had an annual deficit for a number of years. Members of the legislature are endeavouring to find some new source of income, but are experiencing considerable difficulty in finding a satisfactory solution because already the tax payers have more than sufficient burden on the taxes already imposed.

We utterly fail to see why some people should treat with levity the suggestion to tax bachelors. We fail to see why just as soon as calls upon their incomes. A class which can more easily obtain the benefits of the community and contribute practically nothing towards the costs of the country. We refer to the bachelors; and when we refer to bachelors, we cannot exclude (in these days of equal rights) our friends the spinsters.

We utterly fail to see why some people should treat with levity the suggestion to tax bachelors. We fail to see why just as soon as a couple marry and incur all the responsibilities of life, they should so frequently find themselves further handicapped by having for the first time to meet the requirements of taxation (whether that taxation be municipal or provincial we care not—it amounts to the same thing).

In the Argentine republic which has been termed the Canada of South America, a tax on bachelors is in force. In this progressive country, for such it is, a man who has not married must pay the exchequer a tax approximating \$5 per month. As he grows older he has to pay more. At 35, if still unmarried his tax grows to double that amount mentioned. This figure remains stationary for the next fifteen years. After this the tax imposed diminishes until the bachelor reaches the age of eighty years, when he becomes exempt.

It is self-evident that the average bachelor, by reason of his equal wage and lesser responsibilities, is more than \$20 per month ahead of his benedict brother and can well afford to contribute his quota to the public revenue. Therefore give the bachelor a chance to "do his bit."

Occasionally, of course, a bachelor has responsibilities equal to that of a benedict. For instance he may be maintaining a home for his parents, or he is the sole support of some member of the family, who would otherwise be a charge to the public. There are also some bachelors, who like the land-owning farmer and who already pay taxes. All such bachelors might fairly be allowed certain reductions; but the great majority are better able to contribute their share of taxation with greater ease than many who are now paying.

There is, we maintain, no reason why the bachelor, (or spinster) who is in receipt of a good wage or salary, should escape the burden of citizenship. —taxation.

The increasing number of husbands who leave for parts unknown and let their families shift for themselves is something that should command more attention by the authorities or by the organizations that work for better social and moral conditions in our land. There is scarcely a village, town or municipal district that is not dealing with one or a number of these cases where the family has been left destitute by the husband and father, and thrown upon the mercy of the public and nine times out of ten the ratepayers foot the bill. The governments are quite averse to spending money to bring these erring providers back to face the music, but that is just what should be done. Legislation providing for a public lashing upon his return should be enacted. This would soon put a stop to this growing menace and put fear into those who may have a notion of departing from their families. Since the government does not see fit to

do this, here is a real job for a lot of well meaning people who cry to the high heavens for legislature to regulate what a man should eat and drink, but leave a vast field for social and moral uplift untouched—disagreeable as it were—but its there.—Viking news

An Alberta farmer's wife says farmers "plow and sow in hope, live in faith, and market by accident." Isn't that an over-drawn picture? Since the dawn of creation the urban world has drawn pretty regularly and the stuff consumed didn't grow on the roofs and sidewalks. Let's be frank about it; is farming as big a gamble as manufacturing or retailing.—Ottawa Journal.

Canada's birth rate continues downwards, but a greater proportion of infants survive. It is at least to be said for civilization that it treats its little guests better than it used to do, even if it invites fewer of them.—Toronto Star.

### ADDITIONAL LOCALS

Victoria Day was spent, for the most part, by the citizens of Chauvin in gardening, and doing all kinds of jobs around.

Mr. and Mrs. S. McNutt, who have been visiting Mr. and Mrs. G McNutt, left yesterday on their way to Vancouver.

The editor is away again receiving X-ray treatment.

Chauvin baseball team visited Neilburg Victoria Day and played their first game of the season. The result was a victory for Neilburg on a 9-2 score.

Another shipment of Guppelbeiter, Prim-ost and Ry-Krisp at Saker's.

Honey as pure as the bee makes it—10 lbs for \$1.90 at Saker's.

We regret to learn that Ernie Pitman is on the sick list.

The New and Old Ribstone schools held a joint picnic at Ribstone last Friday. A very pleasant time was spent, despite the showers. Basketball was the order of the evening and a dance was held at night at which the Chauvin Orchestra played. There was a good attendance from outside points. Edgerton being well represented.

### WEDDING BELLS

#### MARTIN—PRICE

The marriage of Donald Murro Martin and Hilda Price was solemnized at the bride's home Ribstone district on May 25th. Mrs. J. L. Pound played the Wedding March, "Lohengrin" and "Wedding Bell March"

After the ceremony was performed, several pieces—"Pal of My Dreams" etc. were played by the pianist accompanied by violin and mandolin.

The company including a number of happy friends sat around a sumptuous table laden with refreshments. The usual "Toasts" and "speeches" followed. A song and recitation was ably rendered by Mr. LaPlante, on request. The deck was cleared for action and a happy little dance followed.

The marriage ceremony was performed by the Rev. P. F. MacSwiney, Chauvin.

Pineapples for preserving at Saker's.

"Does he lead an active life?"  
"Very Active. The debt collectors keep him on the jump."

At best, the music teacher's business is scaly.

### LOCAL NOTES OF INTEREST

The Laura Seord Rebekah Lodge, of Chauvin, was honored last Tuesday evening by the official visit of Mrs. Ethel E. Brown, of MacLeod, president of the Rebekah Assembly of Alberta. After the regular meeting a social hour was spent at the residence of Mrs. A. E. Keith.

Mrs. Selius Djuff left for Victoria, B.C. last Wednesday afternoon for the benefit of her health. She was accompanied by Mrs. A. Lavold, who is nursing her.

The latest recruit to the band of local bee-keepers is Mr. C. W. Ryall, who received a shipment last Saturday.

Mr. G. M. Saul has also arranged for a batch of bees and expects their early arrival.

A new thing in balloons for children only 10c the best yet at The Chauvin Pharmacy

A number of the local Old-Timers are urging that they hold an Old-Timers picnic about the last week in June. We hope they do, and wish them every success.

There will be considerable increase in the number of acres sown to sweet clover in this district during this year. John Duncan is seeding thirty acres.

A two day bee was held at the Robert Stoddard farm, Oxville, Monday and Tuesday, May 18th and 19th. Bob has been pretty sick and is not yet on the active list. The good turn out of neighbors, and their work, will be of great help to him.

Mr. T. H. Smith was stricken with an attack of paralysis last Tuesday, and now lies in a very helpless condition. His daughter, Dorothy, who has recently graduated as a fully qualified nurse, and Mrs. Smith, who attended the ceremony, have arrived home.

Look up Saker's ad. this week. It will pay you.

Miss Ethel Smith and Mr. Guy Smith of Winnipeg, have come to visit their father, Mr. T. H. Smith.

The Chauvin basket ball team have gotten away with a good start this year by victories, with big margins, over Edgerton and Ribstone, at the Ribstone picnic Friday last.

Good old Ribstone. They arranged the first picnic; and we have all had a nice rain.

With the object of gathering in funds for the Sacred Heart Church, Chauvin, a popularity contest is to be held. The result of the contest will be made public after its last day, June 24th.

See the thoroughbreds and their jockeys fighting every step of the way; The daring attempt to kidnap the winning jockey, all this and more in this production. Chauvin next Monday and Edgerton next Tuesday. Made with an all star cast.

The next regular meeting of the Ribstone W. I. will be held in the Municipal Hall on Saturday, June 6th.

Suredeath Strychnine 85c per oz. Ask for better quotations on 20 oz's or more. We also have liquid Gophericide at 75c per can. The Chauvin Pharmacy

Don't forget Airie picnic and dance on June 17th. Keep this date open and come and have a good time.

The "C" Squadron 19 A. D. will hold a shoot at the range Saturday, May 30, at 4 p.m.

At this season of the year all stables, chicken houses and boxes should be thoroughly disinfected to kill vermin and disease germs that are sure to come to life with summer heat. Kreso Dip is the most effective and most economical, 5 times the strength of carbolic acid. Directions given on every can for making your solution with water.

The Chauvin Pharmacy.

### CHAUVIN AGRICULTURAL SOCIETY DIRECTORS MTG.

(Continued from page one)

Moved W. Petrie—Mrs. Armour that the tree committee have the land prepared for the planting of the trees. Carried.

The committee on the Judging Competition had very little to report so the matter was left for further development.

Secretary reported that he had received the pasture rent for 1924 from Mr. G. Reynolds.

Moved J. Tooth—E. A. Pitman that the school taxes for 1924 be paid so as to secure the discount. Carried.

Moved E. A. Pitman—W. Petrie that A. E. Keith be a committee to collect \$1.30 from each of the directors who received trees or plants from the Scott Experimental Station to defray the expenses of the trip. Carried.

Moved A. E. Keith—E. A. Pitman that the directors extend a vote of thanks to Mr. Matthews, Supt. of the Scott Experimental Station for the courteous manner in which the representatives were received. Carried.

Moved W. Petrie—Geo. Gibb, about as much enthusiasm as they would for a case of small-pox.

The Secretary reported that the Municipal District grant of

\$150 had been received and \$100 paid to the bank on a note and that we still owed the bank \$101.60 due May 26.

The next meeting to be held on the regular meeting day, the first Saturday in June.

The meeting adjourned.

The following members were present:

Dr. Folkins; Mrs. Armour; Mrs. Tooth; Mrs. Folkins; W. Petrie; J. Tooth; G. Gibb; A. E. Keith; E. A. Pitman. P. H. Perry, Secy.

Romance, Comedy, Mystery, Thrills, and the greatest racing scenes shown in motion pictures, with the beautiful natural settings of the old country, in the great British production, "Come on Loving Cup" which will be shown at Chauvin next Monday, and Edgerton, next Tuesday.

A real old time picnic will be held by the Manitou Lake Agricultural Society on the Manitou Lake picnic grounds on Saturday May 30th. Everybody welcome. Ladies please bring baskets.

Don't forget the date. Come and have a good time.

Some men look for work with about as much enthusiasm as they would for a case of small-pox.

"He had the nerve to walk into the hotel and take a bath without paying for it."

"Did he get clean away?"

**WILTING IS****DESIRABLE BEFORE****ENSIING LEGUMES**

Silage from legume crops or mixtures of legumes and cereals appears to be of a much more desirable quality if these crops are wilted for several hours before ensiling. The wilting of alfalfa, in particular, seems to be essential, if good silage is to be made.

Alfalfa, sweet clover and a mixture of oats, peas and vetches were stored at the Central Experimental Farm, Ottawa, in small wooden silos during the summer

of 1924. Each silo was 6 feet high 3 feet in diameter and held approximately half a ton. The various trials with these crops, which occupied 21 silos, included cutting at different stages of maturity, ensiling before and after wilting and storing for periods of three, six and nine months. The silos were opened during the winter of 1924-25 and the silage was in every respect comparable to that which is produced in large farm silos.

The results of one year's work, though not exclusive, indicate that the stage of maturity and the amount of moisture in these crops at the time of ensiling have

an important bearing on the silage produced, the reduction of the original moisture content of the crops by wilting showing the greatest benefit.

There seems to be a greater likelihood of securing a desirable silage from full bloom alfalfa than from this crop cut at an earlier stage of maturity. There is an advantage in cutting sweet clover when the flower buds are well formed but before the crop blooms because there is a greater probability of securing a second cutting if the crop is mowed at this stage than if let to go until the full bloom stage, although the silage from full bloom sweet clover was just as good as that from the crop cut in the bud stage. Silage of good quality was secured from oats, peas and vetches ensiled when oats were in the but the latter stage or just when the oats show the first signs of turning appears to be the most desirable time to cut this crop.

From alfalfa which had been mowed when one-tenth in bloom and wilted in the sun for at least five hours or for a relatively longer period if the sun was not shining, a fairly good silage was secured, while full bloom alfalfa wilted in a similar manner gave a silage of better quality and of considerably greater palatability. Alfalfa ensiled immediately after cutting no matter what was the stage of maturity, gave an undesirable and unpalatable silage. The wilting of sweet clover, and oats, peas and vetches for several hours resulted too, in the production of a type of silage which was somewhat more palatable than that produced by unwitting material.

The length of the period of storage appeared to have little effect upon the silage which was produced.

**ALBERTA CROP REPORT**

Seeding of wheat is practically completed throughout the province at this date, save in the territory immediately tributary to Edmonton, which appears to be somewhat later, and where from 50 to 75 per cent. of the wheat is in the ground. A few days more of the present favorable weather will see the completion of wheat seeding in this district.

Reports received indicate that the increase in wheat acreage over the province will probably be 10 per cent. Delay in spring operations due to backward weather in the more central and northern districts has led to considerable area of wheat being seeded on stubble, a larger area than usual being put in in this way.

Seeding of the coarse grains is well under way with from 30 to 50 per cent. completed.

The weather generally speaking during the past fortnight has been cool and backward, with frosts in certain localities and growth consequently has been slow. In some of the southern districts early sown wheat is up from two to four inches. Warmer weather has prevailed during the past few days, but there has been no precipitation to speak of in any locality since last report. Moisture conditions continue satisfactory, however, there being sufficient in the soil to give good germination.

Pasture is improving rapidly, and stock is picking up in condition. A good deal of water is still lying in the low places in nearly every district in the province. Sloughs which have been dry for some years are well filled. In the southern districts there has been a very large increase in the area given over to sweet clo-

ver, corn and alfalfa. In the Lethbridge district, planting of sugar beets is about completed. Percentage of winter killed winter wheat and rye is small.

No serious outbreak of grasshoppers is anticipated this season. Farmers, however, are urged to keep a sharp look-out for any, outbreaks that may occur and report same to the Department at Edmonton at once.

**HIS GOLD CROWN**

The teacher was inculcating principles of morality and religion in the minds of her young charges, and she said: "Now, children, if you do right always, you will each wear a gold crown some day. Just think of that!"

"Yes," said a pupil, "my father always does right, and he has a gold crown."

"He has?" asked the teacher. "I know your father well, but I never saw him wearing a crown of gold."

"Oh, no," was the answer, "he doesn't wear it on his head—he carries it in his pocket-book."

"And my father," said little Susanna Riechstein, "he has a gold crown—but he wears it on his tooth!"

**LUTHERAN SERVICES****IN ARTLAND**

On Sunday, May 24th, the Rev. L. Breitenbuecher of Leipzig, Saskatchewan, will hold Lutheran services in the Brady School, five miles north of Artland. German service will begin at 2 o'clock.

Services were held in Brady school a week ago Sunday, but the attendance was small. A far better attendance is looked for next Sunday.

**BIG FIRM ENCOURAGES  
CO-OPERATIVE MARKETING**

There is one very large corporation in the United States that be lives in actively encouraging co-operative marketing among the farmers. This is Sears Roebuck Co., which conducts an agricultural foundation for the benefit of the farming communities. In a letter to Mrs. F. E. Wyman, of the Alberta poultry pool, Mrs. Mary Puncke, formerly a prominent member of the U. F. A., and now an official of the Sears Roebuck agricultural foundation, tells of what that corporation is doing to encourage the farmers to go in for co-operative marketing. Mrs. Puncke states that farm organization in the States is in its infancy, and the foundation for which she works is earnestly endeavouring to encourage all farm organization and improve economic conditions among the farmers.

**BOARDS OF TRADE  
GIVE ENDORSATION**

Endorsation of the pools has been given by a dozen or more of the boards of trade throughout the province, and the Edmonton board of trade has named June 5th as a day for a special meeting at which speakers for each of the three pools will be present. Support for the pools in their membership drive is coming from many quarters in the province, and the outlook for obtaining the objective during the drive is very encouraging.

CANADIAN NATIONAL  
RAILWAYS

#### FOURTH ANNUAL TOUR TO THE PACIFIC COAST

Special Train From Winnipeg  
via Canadian National Railways  
Entertainment Provided for  
at Various Points of In-  
terest En Route

#### PERSONALLY CONDUCTED

Personally conducted tours offer the best opportunity for familiarizing oneself with the country traversed. This applies to our own country as well as to the older settled countries of Europe. Canadian National Railways has, for many years, commencing immediately after the close of school for the summer holidays, conducted special parties to the Pacific Coast via Prince Rupert. The tour this year which will be the fourth will again commence at Winnipeg from which point a special train of modern sleeping car equipment, dining car and radio observation car will leave July 6th. After stopping at various places of interest, the train will arrive at Prince Rupert on July 11th. At this later point, the party will embark on a palatial steamship for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to Victoria, may have their tickets read "Victoria" as their destination with out any additional cost.

This tour is an outing that appeals strongly to teachers as well as to professional men, and business men and women.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour, including the cost, choice of routes returning etc.

#### SWEET CLOVER

(Continued from page three)

\$2000 WORTH OF SEED FROM FORTY ACRES

"In 1912 a neighbour harvested a forty acre field adjoining the first field mentioned. This was also a volunteer crop, as even yet no one had the faith to sow the seed. He secured a wonderful yield of seed, marketing it in Chicago at \$15.00 per hundred pounds. This forty-acre field netted the owner over \$2000. People began to sit up and take notice, especially so when one of our largest sheep concerns paid \$250 for the sweet clover straw stacks and stubble and wintered a large band of sheep on it, bringing them out in the spring in prime condition."

By the fall of 1914 the use of this plant as a crop had increased enormously. Besides considerable acreage used for pasture and hay, there was sufficient acreage harvested to put at least four ears of seed on the northern and eastern markets, in addition to the large amount saved for local use. That yield the largest yield of seed was a trifle over ten bushels per acre on a field of thirty-eight acres. Our farmers had discovered that they grew sweet clover on the poorest land, that which had become water-logged from excessive irrigation, for the above yield was made on just such land, land which had successfully resisted every effort to make it produce through a long period of years, and further this sweet clover is a practical crop, yielding a big return in pasture or hay or seed, at the same time building up the soil to an even greater extent than alfalfa. Further it has been discovered that once stock become accustomed to sweet clover, they eat it in preference to alfalfa and other hay, and they do remarkably well on it."

(The third article will treat of the clipping and cutting for hay)

#### RED CROSS NOTES

The "Story in Pictures" an illustrated Red Cross lecture has been prepared by the Alberta Division Red Cross with accompanying lantern slides for the information of the public and all who are interested in the workings of the Peace-time Red Cross in Alberta. This most interesting and entertaining lecture covers a wide ground but the special feature is the story of life in the Children's Hospital Calgary. Here under the care of the Junior Red Cross the crippled and sick children of this province are treated, and in most cases are cured of their physical defects. The story as told in the lecture is intensely human, and has a great appeal to all who love little children and desire their best welfare. Indeed the work of the Junior Red Cross as a whole is a beautiful record of loving service by children who are blessed with health and strength, on behalf of those who have neither. Its phenomenal success in the schools of our province, where there are branches with a membership of 15000 children, speaks volumes for the Red Cross Society. Day by day the increasing value of the good citizenship which it instills into the young minds, and the hygienic habits of living which are part of the membership pledge, is evinced in many communities. Whoever Red Cross Juniors are found, these one may be sure of healthy clean bodies, for these young folks are in honor bound to live up to a high standard of personal hygiene, as expressed in the Health Game Record, a system of self discipline on health lines which is productive of the greatest practical good.

The chief expression of the Junior's activities is the maintenance of the beautiful Hospital in Calgary, more a home than an institution as the pictures show. Here any sick or crippled child, whose case has been investigated as worthy of Red Cross assistance, is admitted, and in a bright cheerful atmosphere, with educational facilities in the hospital school conducted for the patients who are able to receive instruction, the little ones are nursed back to health and strength. The

lecture shows a "Before and After" series of photographs, i.e. the child on entrance with all its defects, and the child as it returns home with straightened limbs, with new surgical boots and other appliances, a happy, useful, healthy and educated citizen. You are cordially invited to obtain this lecture from the Alberta Division Red Cross Calgary for exhibition in your community. Sent free on request to any address in the province.

#### WHEAT POOL CONTRACTS

Canvassers for the three pools will also carry with them contract forms for the Wheat pool which has been in operation now for two seasons. It is possible that many farmers who have not already signed up with the wheat pool may wish to do so, and this will give them opportunity.

"What would women do if they hadn't clothes to talk about?"  
"Present fashions suggest that we shall soon know the answer."

#### PROMINENT SPEAKER IS COMING TO AID THE POOLS' ORGANIZATION

Word has been received by the Joint Organization Committee of the dairy, livestock and poultry pools that W. J. Park, president and managing director of the Fraser Valley Milk Producers Association, will come to Alberta for one week to assist the pools in the drive for membership which starts June 8th. It is expected that Mr. Park will be here for the first week of the drive. He will address meetings at several places in the province. Mr. Park has had much to do with success in co-operative marketing of dairy products by the Fraser Valley Association. The farmers in this pool have been getting from three to four cents more for their butterfat than the Alberta farmers, and generally speaking have been able to get about seventy per cent of the price the consumer paid for their product, as compared with fifty per cent which the Alberta producers get. Mr. Park will be able to give some very interesting information about co-operative marketing to the Alberta farmers.

Wise is he who knows when not to be patient.

#### PLANS FOR THE DRIVE

The directors of the three pools will meet in Edmonton Wednesday to complete plans for the membership drive. Each of the seven divisions of the province represented by a director in each pool, will be divided into districts, and a director placed in charge of each district, which will be thoroughly organized, with captains in charge of the canvassers, of which there are now about 400 appointed for the province. The director in charge of each district will cover the district a week before the drive starts, appointing captains and arranging for the halls for meetings. More than 300 of the 500 meetings to be held have already been arranged for, and the advertising of these meetings is to commence shortly. Auto stickers are also being provided for advertising the dates of the drive. The joint organization committee is now making its head quarters in Edmonton until the completion of the drive on June 28th.

The average man's idea of a business transaction is one in which he gets the best of the bargain.

There are sermons in stones and ice cream in bricks.

## Farm Machinery

**CULTIVATORS:** McCormick-Deering for all crops. One and two row, riding and walking, disk and surface cultivators. All varieties of shovels and beams. Also Lister Cultivators

**THREE FURROW GANG PLOWS:** The popular features of the P. & O. Two-furrow Diamond Gang Plow has resulted in a demand for a larger plow of the same design. The P. & O. Three Furrow Plow is easy to operate, powerful foot, high lift, automatic rear wheel control and light draft

**CREAM SEPARATORS:** McCormick-Deering Primrose, hand or power operated. Capacities 350, 450, 650, and 1000 lbs. Turns one-third easier than plain bearing machines

**TIRES & ACCESSORIES** Our Stock is Complete. The recognized Standard Goods only. No inferior substitutes offered.

**ACETYLENE WELDING** All Work Guaranteed. Prompt Delivery of Finished Work. Moderate Charges.

**Parcels & Harris,** Phone 11 Chauvin

### DEATH OF INFANT SON OF MR. & MRS. M. TENNANT

On May 7th 1925, Allen Roger, the infant son of Mr. and Mrs. Maynard Tennant, who was born March 14th 1925, passed away.

In the presence of a large congregation of friends and relatives assembled in the Church of England at Edgerton on Saturday the 9th day of May a solemn funeral service was held for the infant son of Mr. and Mrs. Maynard Tennant by Rev. R. Sage.

Following the service the funeral proceeded to the Edgerton cemetery, where the body was interred.

The following acted as pall-bearers: Roy Tennant, Cecil Tennant, E. McCaully and Allen Tennant.

The angel of death has called away

Our loving baby from our side.  
The earthly friend we loved so dear,

Has drooped his head and died.

He has gone to meet our friends so dear.

Who's died and gone long years ago;

And we hope in heaven to meet him

When we too are called to go.

And when death's river we have crossed,

And gain the happy shore,

We hope to meet our friend so dear

Where parting is no more.

### CARD OF THANKS

Mr. and Mrs. Maynard Tennant wish to thank their many friends for expressions of sympathy and kindness in their sad bereavement.

### JUNIOR RED CROSS IS ORGANIZED AT KILLARNEY SCHOOL
